

Avni Hindocha  
RUMS Pre-clinical Vice President

### Manifesto

As pre-clinical vice president of RUMS, I want to work with the RUMS committee to represent all of you, the student body.

One of my main aims would be to bring the medical school together as a whole. I remember my first few weeks as a RUMS student - daunting, exciting, a bit haphazard and, at times, uncomfortable. More joint first and second year events during the first few months such as the "Mums and Dads" initiative would make life easier for freshers and help them settle in. This would also give second years a greater feeling of responsibility to the medical school.

Also, I believe in making it easier for students to be able to contact professors or lecturers for individual needs. Whether this be by email or in person, better access to the people who teach us makes our learning experience a lot more efficient and enjoyable.

I would also like to increase the time spent in smaller group tutorials, as I have found these to be popular and beneficial. Personally, I believe we should get more time in clinical skills or more advice about assessments, but I would always be interested in hearing your opinions about our timetable or any other matters concerning RUMS.

I can be efficient and a good listener to your problems, but I will speak out when things need to be said on your behalf. I'm on your side! My main priority would always be the needs of the students and improving the quality of our education. I am patient and a hard worker. I will always do my very best to act on your problems quickly, and I will put the effort into anything I am set to do.

Of course, I appreciate the already effective changes that the current and past RUMS executives put into place, and would look to taking them even further whilst working alongside a dynamic team.

I already enjoy other activities such as RAG, dance and sport, but I feel that I would like to dedicate some of my time within the medical school itself and give back to the community that gives to me. Ultimately, this will be the biggest influence of my life during and beyond my time at UCL, and I'd like to make it the best time for everyone.
