

MANIFESTO:  
OSCAR NOBI for MEDICAL & POSTGRADUATE STUDENTS' OFFICER

➤ **Experience**

I am currently **Vice-President** of the **Postgraduate Association** and a member of:  
Union Council (the Union's policy-making body);  
Postgraduate Association Executive Committee;  
Academic Board;  
Services Committee;  
Student Affairs Committee; and  
Societies Board.

I have therefore experienced the workings of Union and College from a number of perspectives and I can bring this experience to the role if elected.

➤ **Other Involvement**

Sub-editor and contributor for Pi Magazine.

Member of the UCLU Drama Society and will be directing a show in the Garage Theatre Workshop this term.

➤ **About me**

I am a postgraduate student studying for a Master's in Law. I therefore fully understand the concerns of postgrads at UCL.

In addition, I am close friends with a number of medics (some of whom I live with) so I have heard and very much understand the issues of the medical student community.

For **postgrads** I would continue to develop a thriving postgrad community by arranging events specifically geared towards them and by keeping them aware of what the Union has to offer.

For **medics** I would work towards maintaining their independent identity by, for example, resisting mergers between RUMS and Union sports teams. I would also address the different educational and welfare concerns held by clinical and pre-clinical students.

In **both** cases I would also work towards keeping Wednesday afternoons free, as this is vital for all students to get involved with the RUMS' and Union's clubs and societies.

**Postgrads and medics make up distinct and important pockets of the student body and if elected I intend to ensure their specific needs are attended to, and that their voices are heard by the Union, so that they can make the most out of being at UCL.**
